

# Residential Aged Care Income and Assets Thresholds – Single Person – September 2020

An individual's precise contribution to residential aged care costs – accommodation and care – depends on their Means Tested Amount (MTA) and how it compares to the Government's published Maximum Accommodation Supplement Amount (MASA)

$$\text{MTA} = \frac{(\text{income tested amount} + \text{asset tested amount})}{364}$$

- A** MTA = 0
- B** MTA < MASA
- C** MTA ≥ MASA
